

” **TRADITION AND EXPERIENCE**  
are the Basis for  
**DYNAMICS IN THE FUTURE** “

The well known, and traditional family run business in the field of medical technology is lead and managed in the fourth generation by Mr. Thomas Butsch. Through his education, training and experience, the dynamic graduate engineer has what it takes to handle all of the requirements and challenges the future holds. In addition, Mrs. Barbara Butsch, the company's authorized representative, is available to support her son in the area of commercial business.

## MODERN ARCHITECTURE

” documents our advanced  
THINKING AND HANDLING “

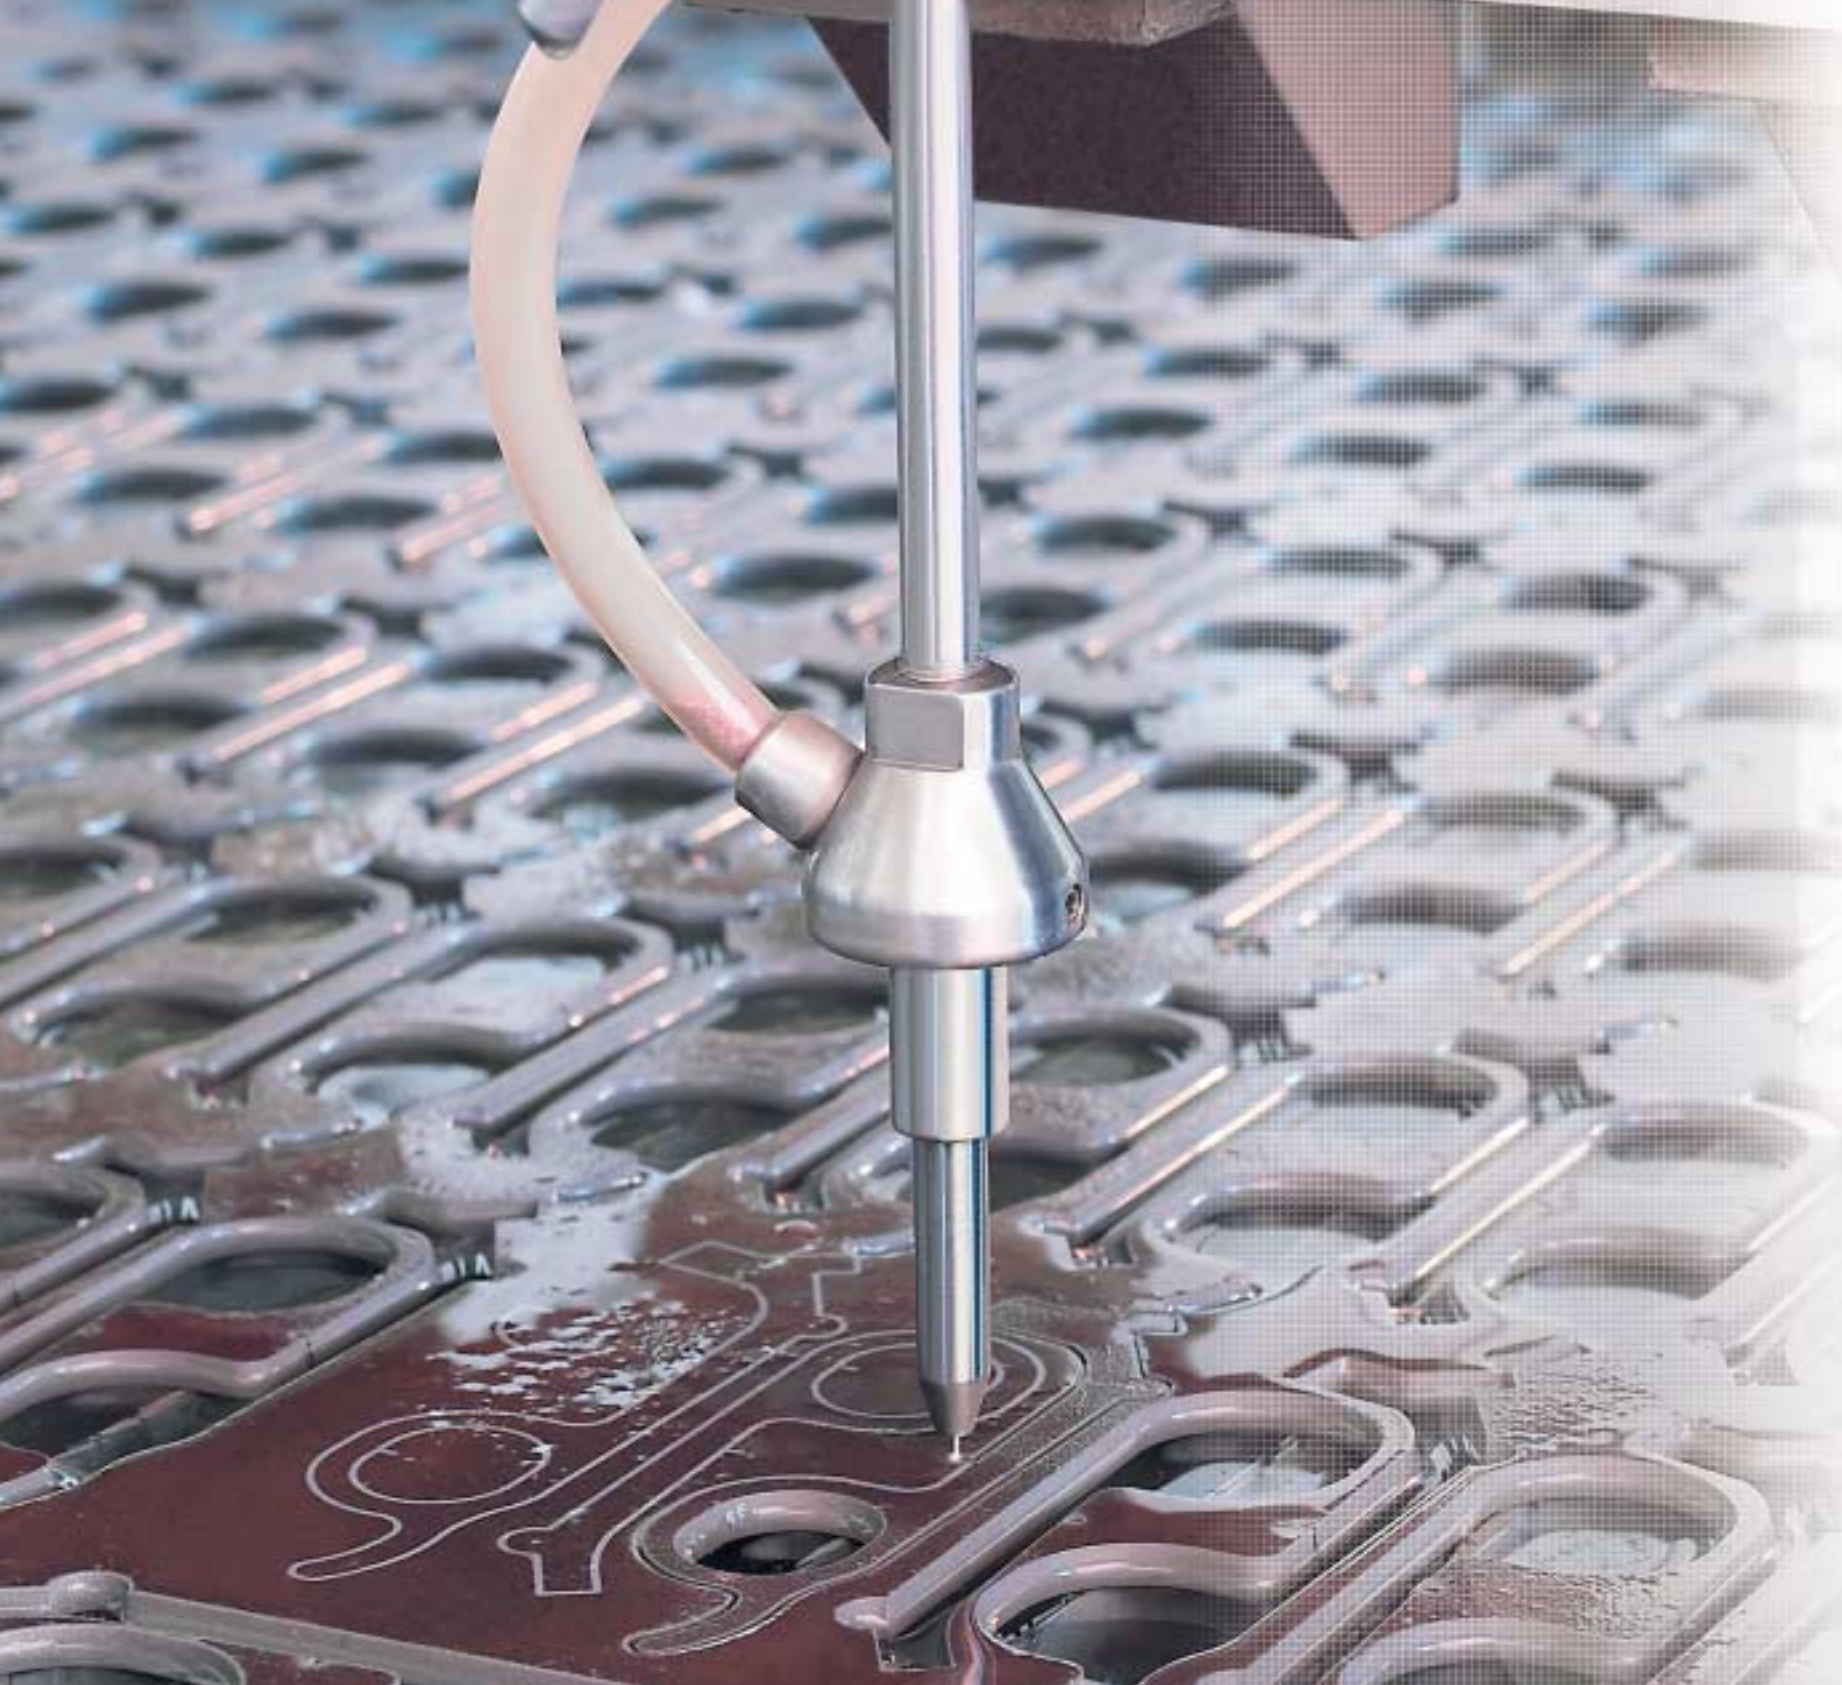

The move into the new company facilities in the year 2003 set an impressive outward sign for future oriented business. The modern architecture of the facilities located in Tuttlingen, Germany, documented the progressive and advanced way of thinking that is anchored in their tradition. Bright rooms motivate the employees and offer the best conditions for effective teamwork. In order to be well equipped for the intellectual requirements of a globalized market, the internal processes have been newly structured.

” **THE BEST RAW MATERIALS**  
are a requirement for  
**PERFECT FUNCTION** “

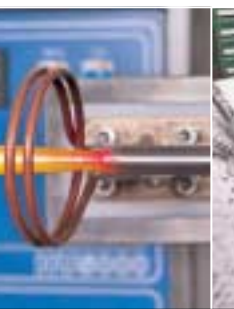

Educated and trained employees are, apart from using the best raw materials available and having facilities with the most modern machines, the ideal requirement for the function of all our products. All articles from our range of more than 9000 items for all areas of general surgery were, without exception, manufactured in Europe. Therefore, we can now, as well as in the future, fulfill all of the demanding quality requirements established for products in the field of medical technology.

” **OPTIMIZED MANUFACTURING METHODS**  
guarantee a marketable  
**PRICE-PERFORMANCE RATIO** “

We are continuously engaged with the rationalization of new manufacturing sequences as well as the implementation of new production methods. Our machinery is regularly updated and always maintained to the most current technical levels. This way, we can guarantee that the products leaving our company are always representative of a convincing and marketable price performance ratio. We supplement the precision of modern machines with the skilled craftsmanship of our employees in order to optimize our quality.

**QUALITY**  
" we do not control,  
**WE PRODUCE** "

An extensive Quality Management System is implemented in our company. This way, we can guarantee that quality is not controlled at the end of production but right from the beginning and through each and every manufacturing step. Each manufactured part passes through several control stations during its production process before final inspection is carried out. Our company is certified according to DIN EN ISO 9001:2000, DIN EN ISO 13485 and the EC-Guidelines 93/42/EWG.

” **SATISFIED CUSTOMERS**  
for us have  
**UTMOST IMPORTANCE** “

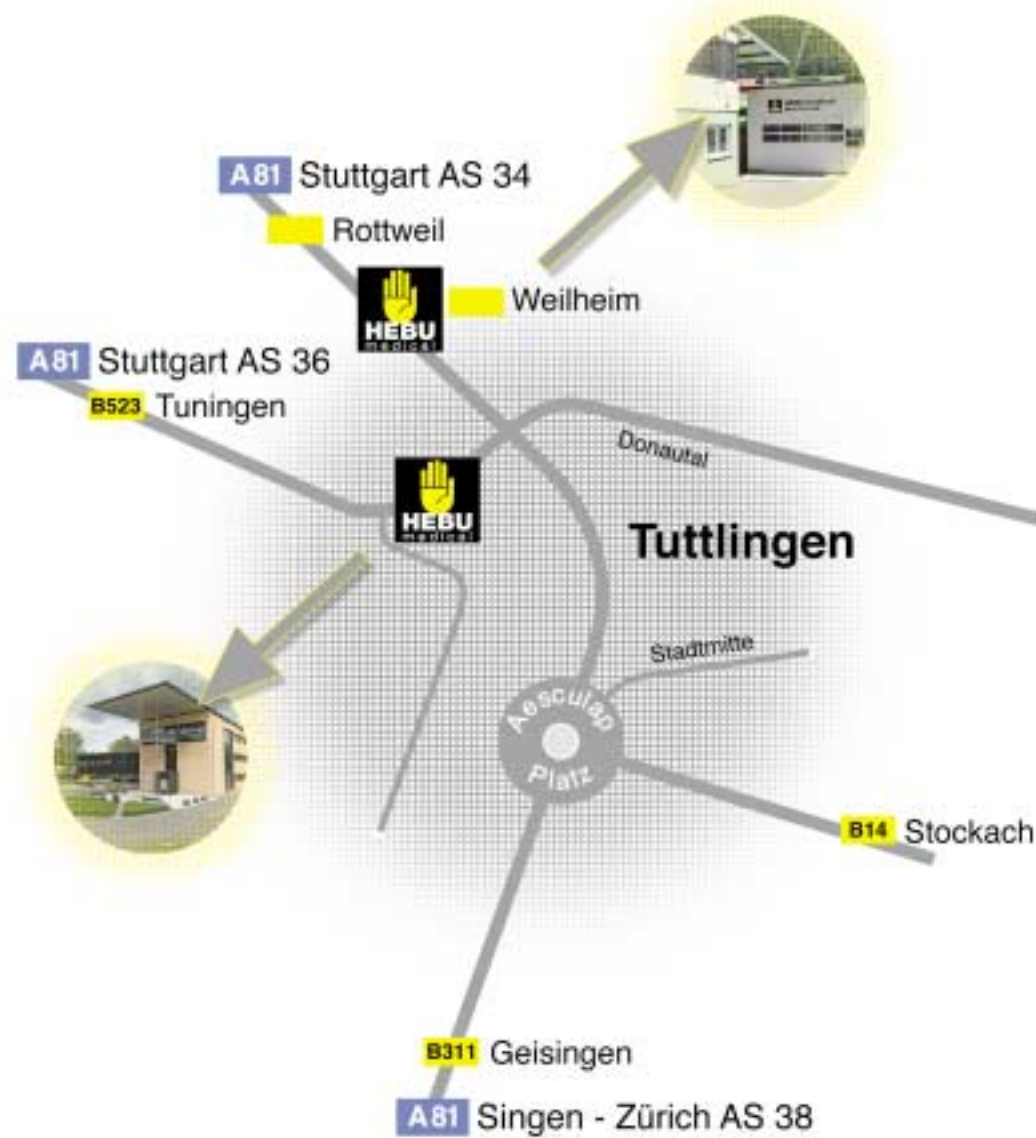

Satisfied customers are a daily focal point in our company. We are in regular contact with them either by telephone, fax, mail or in personal discussions. In order to guarantee quick and complete deliveries to our customers worldwide, nearly all articles in our extensive range are kept in stock. Through the flexible organization of the production, we can quickly react when a customer has a special need.

” **OUR LOCATION**  
guarantees sound knowledge  
in the field of  
**MEDICAL TECHNOLOGY** “

The headquarters of our company is in Tuttlingen, Germany, well known as the center of medical technology. Since decades, research, development, construction and production have been carried out in this special area. Due to this, special knowledge and skills could develop that are used by doctors in their daily practice throughout the world - always to the welfare and well being of the patient.
